## On-boarding Introduction

Welcome to Progressive’s API developer portal. This document is meant to be an on-boarding initiation to the portal, how to register to the portal, and how to use it to access Progressive’s APIs.

## Portal Developer Experience On-Boarding

In your browser go to <https://developer.progressive.com/s/vendors>

## Register A Developer Account

Follow the below instructions to register a portal developer account on the [developer.progressive.com](https://developer.progressive.com) portal:

1. Click on any of the API’s and click on the “Learn More” button to view content about the API you are interested in.
2. Click on the “Register Here” button and fill out the registration form. Once you are approved you will receive an email to create an account.

(All fields are required.)

\* First Name or Company Name

\* Last Name or Company Group Identifier

\* Company Email

\* Company Name

\* API's of interest

SIGN UP

## Welcome to the Progressive Developer Portal

To begin working with our APIs please click the button below to visit our portal where you will be prompted to enable MFA(Multi Factor Authentication). Please pick a preferred mobile authenticator app then scan the QR Code to start the verification process.

Login

4. Multi-Factor Authentication (MFA) registration is required. You can use the Salesforce Authenticator app or the Microsoft Authenticator app (other reputable third-party authenticator apps might also work such as the Google authenticator app). To use an alternative to the Salesforce Authenticator app, click on “Choose Another Verification Method” and follow the steps in the below screenshots:

### Connect Salesforce Authenticator

For security reasons, you have to connect Salesforce Authenticator to your account. The app sends a notification when we need to verify your identity, and you verify with just a tap. You can also enable location services to have the app verify you automatically from trusted locations. The app provides codes to use as an alternate verification method.

1. Download Salesforce Authenticator from the [App Store](#) or [Google Play](#) and install it on your mobile device.
2. Open the app and tap to add your account.
3. The app shows you a unique two-word phrase. Enter the phrase below.

Two-Word Phrase

Continue

## Connect an Authenticator App

Connect an authenticator app that generates verification codes. You can use the codes when we need to verify your identity.

1. Download and install an authenticator app on your mobile device.
2. Use the app to scan this QR code.
3. Enter the code generated by the app.

### Change Your Password

Enter a new password for  **Make**  
sure to include at least:

- 8 characters
- 1 letter
- 1 number

\* New Password

\* Confirm New Password

**Change Password**

Password was last changed on 3/21/2022, 9:54 AM.

## Log into the Progressive Developer portal

Now that you are registered you can log into the Progressive Developer Portal by clicking the “login” button on the developer home page if you were not redirected to the login page during the registration process.

## Partner with Progressive

Create a seamless user experience with our APIs

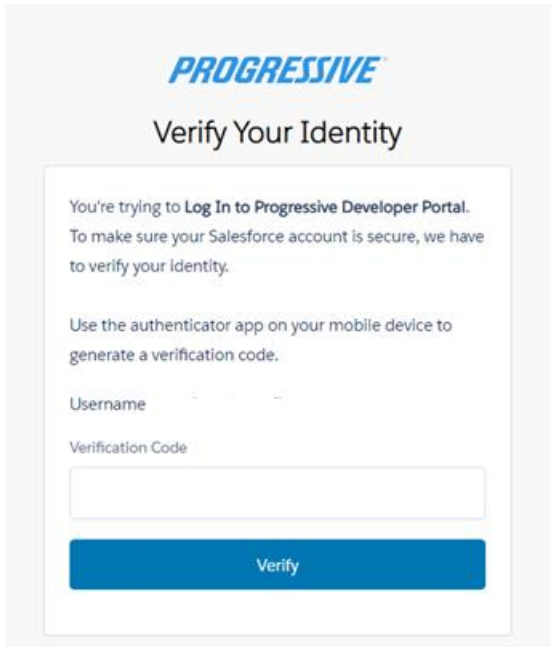

Follow the below instructions to login to your developer account:

1. Enter your email address used to register in the previous registration steps and use the password created to login.

A screenshot of the Progressive login page. At the top is the Progressive logo. Below it are two input fields: 'Email' with an envelope icon and 'Password' with a lock icon. A blue 'LOG IN' button is positioned below the password field. Underneath the button is a link that says 'Forgot your password?'.

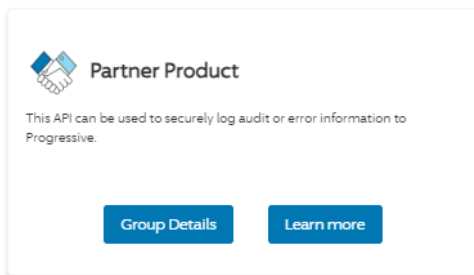

2. Enter your verification code from the Authenticator App

3. You should be presented with the portal user screen with access to the API Products Group.

Here are the APIs you have access to:

Congratulations! You can now start using Progressive Vendor APIs.
