Commercial Auto Quoting Product Onboarding

Table of Contents

Progressive Developer Portal Onboarding

In your browser go to https://developer.progressive.com
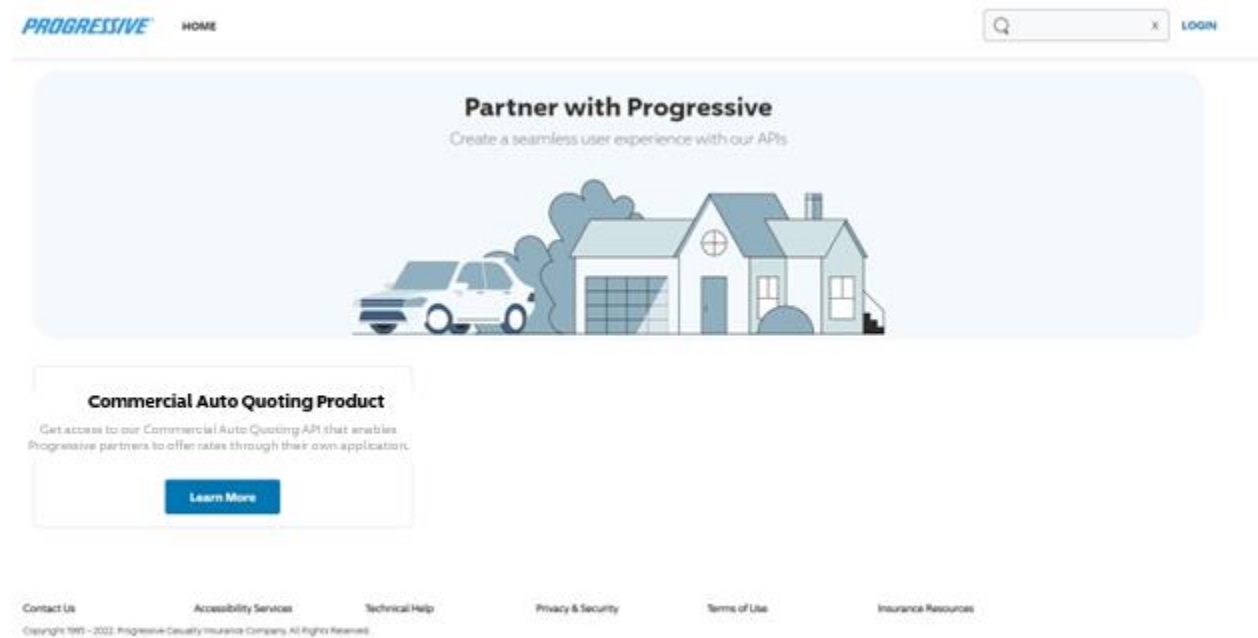

Register A Developer Account

Follow the below instructions to register a portal developer account on the developer.progressive.com portal:

1. Look for the "Commercial Auto Quoting Product" tile and click on the "Learn More" button to view content about the Commercial Auto Quoting API.
2. Click on the "Register Here" button and fill out the registration form. Once you are approved you will receive an email to create an account.

Commercial Auto Quoting Product

The Commercial Auto Quoting API allows Progressive partners to offer rates through their own application. Partners can pass the necessary data (business information, vehicle, and drivers) to Progressive using the API. We will return an indicative rate and one-time user link for bridging to the Progressive experience. After bridging, the user can complete the quote and buy the policy.

Please check your email for notifications.
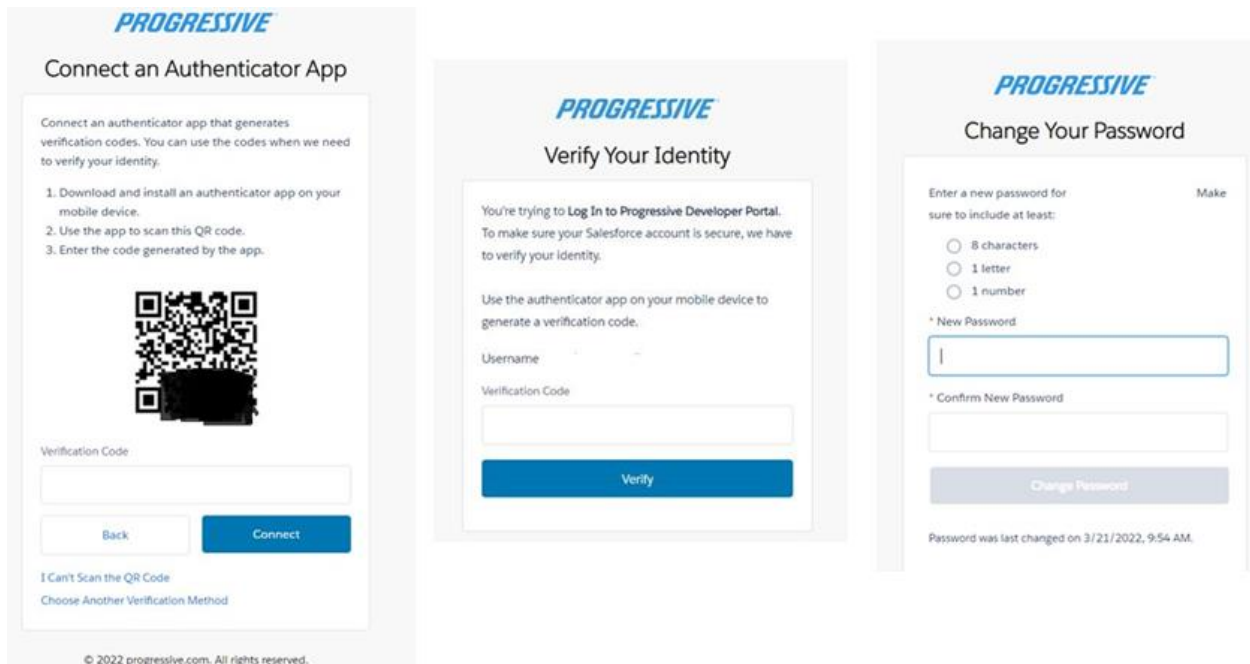

Go back to Home Page

3. Check your inbox for the arrival of an email from the Progressive Developer Portal. Click on the "Login" button presented in the email.

Welcome to the Progressive Developer Portal

To begin working with our APIs please click the button below to visit our portal where you will be prompted to enable MFA(Multi Factor Authentication). Please pick a prefered mobile authenticator app then scan the QR Code to start the verification process.
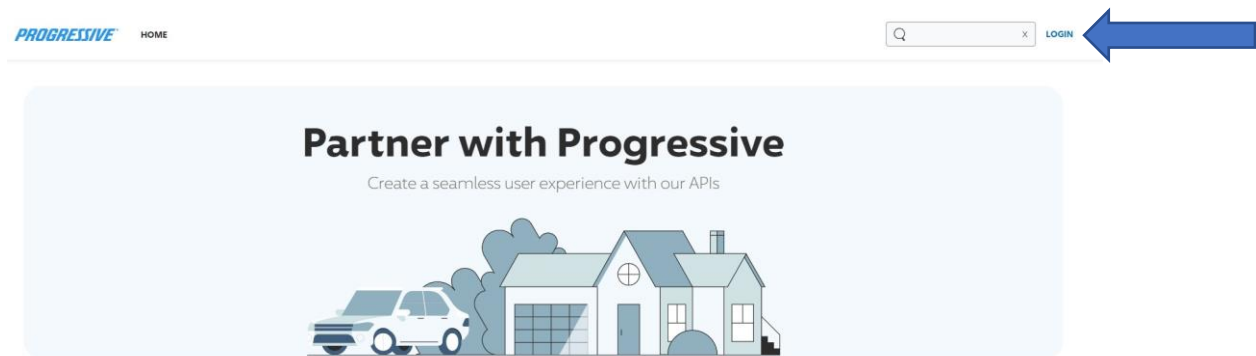

Login

PROGRESSIVE

4. Multi-Factor Authentication (MFA) registration is required. You can use the Salesforce Authenticator app or the Microsoft Authenticator app (other reputable third-party authenticator apps might also work such as the Google authenticator app). To use an alternative to the Salesforce Authenticator app, click on "Choose Another Verification Method" and follow the steps in the below screenshots:
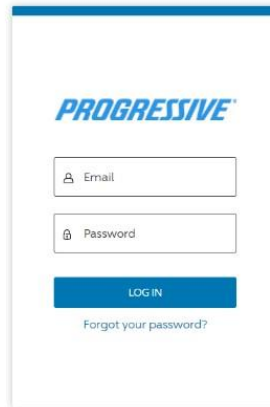

Connect Salesforce Authenticator

For security reasons, you have to connect Salesforce Authenticator to your account. The app sends a notification when we need to verify your identity, and you verify with just a tap. You can also enable location services to have the app verify you automatically from trusted locations. The app provides codes to use as an alternate verification method.

1. Download Salesforce Authenticator from the App Store or Google Play and install it on your mobile device.
2. Open the app and tap to add your account.
3. The app shows you a unique two-word phrase. Enter the phrase below.

Two-Word Phrase

[   ]

Cancel   Connect
