On-boarding Introduction

Welcome to Progressive’s API developer portal. This document is meant to be an on-boarding initiation to the portal, how to register to the portal, and how to use it to access Progressive’s APIs.

Portal Developer Experience On-Boarding

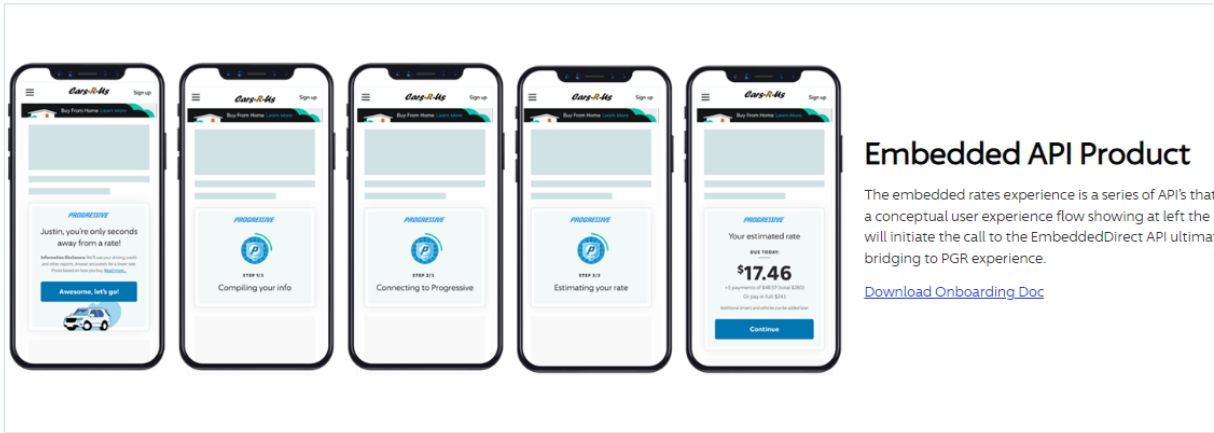

In your browser go to <https://developer.progressive.com>

Register A Developer Account

Follow the below instructions to register a portal developer account on the developer.progressive.com portal:

1. Click on any of the API’s and click on the “Learn More” button to view content about the API you are interested in.
2. Click on the “Register Here” button and fill out the registration form. Once you are approved you will receive an email to create an account.

Embedded API Product

The embedded rates experience is a series of APIs that a conceptual user experience flow showing at left the will initiate the call to the EmbeddedDirect API ultima bridging to PGR experience.

[Already have an account?](#)

3. Check your inbox for the arrival of an email from the Progressive Developer Portal. Click on the "Login" button presented in the email.

4. Multi-Factor Authentication (MFA) registration is required. You can use the Salesforce Authenticator app or the Microsoft Authenticator app (other reputable third-party authenticator apps might also work such as the Google authenticator app). To use an alternative to the Salesforce Authenticator app, click on "Choose Another Verification Method" and follow the steps in the below screenshots:

Connect Salesforce Authenticator

For security reasons, you have to connect Salesforce Authenticator to your account. The app sends a notification when we need to verify your identity, and you verify with just a tap. You can also enable location services to have the app verify you automatically from trusted locations. The app provides codes to use as an alternate verification method.

1. Download Salesforce Authenticator from the [App Store](#) or [Google Play](#) and install it on your mobile device.
2. Open the app and tap to add your account.
3. The app shows you a unique two-word phrase. Enter the phrase below.

Two-Word Phrase

Connect an Authenticator App

Connect an authenticator app that generates verification codes. You can use the codes when we need to verify your identity.

1. Download and install an authenticator app on your mobile device.
2. Use the app to scan this QR code.
3. Enter the code generated by the app.

Verify Your Identity

You're trying to **Log In to Progressive Developer Portal**.
To make sure your Salesforce account is secure, we have to verify your identity.

Use the authenticator app on your mobile device to generate a verification code.

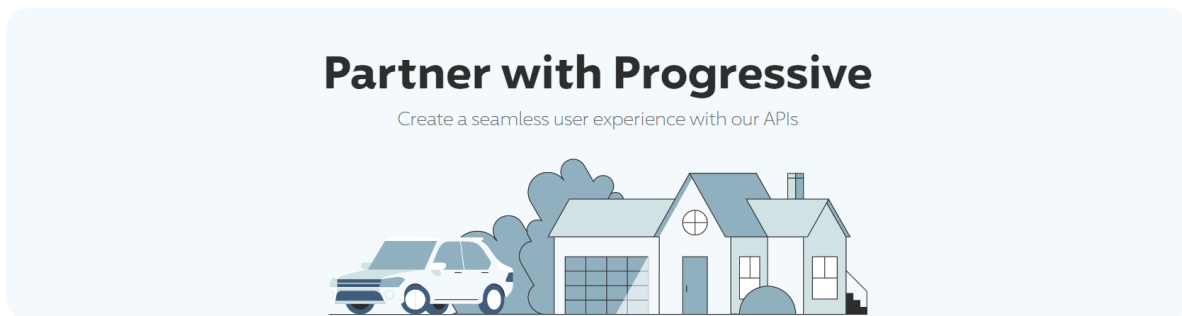

Username

Verification Code

Verify

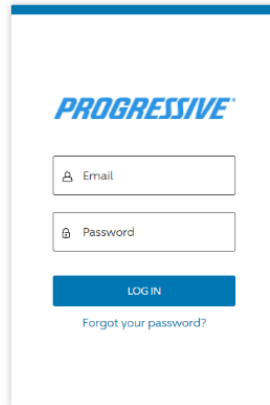

Log into the Progressive Developer portal

Now that you are registered you can log into the Progressive Developer Portal by clicking the “login” button on the developer home page if you were not redirected to the login page during the registration process.

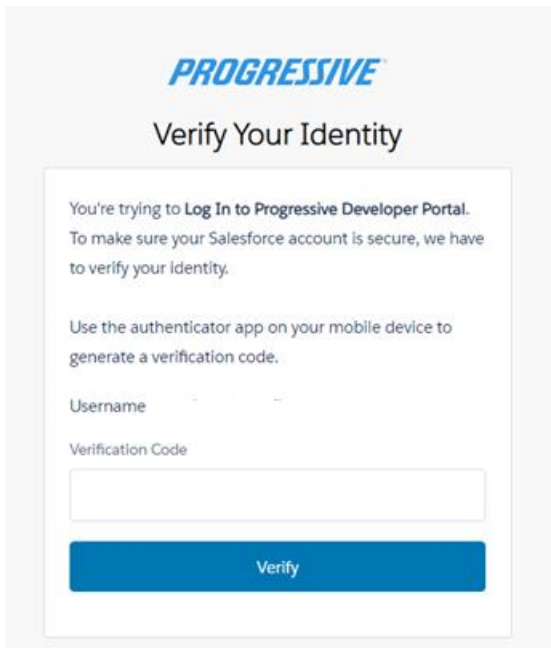

Follow the below instructions to login to your developer account:

1. Enter your email address used to register in the previous registration steps and use the password created to login.

The image shows a login form for Progressive. At the top is the Progressive logo. Below it are two input fields: one for Email with an envelope icon and one for Password with a lock icon. A blue button labeled 'LOG IN' is positioned below the password field. Underneath the button is a link that says 'Forgot your password?'.

2. Enter your verification code from the Authenticator App

The image shows a 'Verify Your Identity' form. At the top is the Progressive logo. Below it is the heading 'Verify Your Identity'. The main text reads: 'You're trying to Log In to Progressive Developer Portal. To make sure your Salesforce account is secure, we have to verify your identity. Use the authenticator app on your mobile device to generate a verification code.' There are two input fields: 'Username' and 'Verification Code'. Below the 'Verification Code' field is a blue button labeled 'Verify'.

3. You should be presented with the portal user screen with access to the API Products Group.

Access our APIs

If you would like to use any other APIs we offer, you can request additional access.

Here are the APIs you have access to:

Affiliates Prefill Product

The Affiliates Prefill API Group enables a third party to pre-populate a quote with address and driver information. Data in ACORD format is posted to the Prefill API which maps that data to quoting fields and creates a quote session.

[Group Details](#)

Congratulations! You can now start using Progressive Partner APIs.
